ABOUT US

BS Inc.'s residential division provides custom design and installation of whole house audio/video, communications, security, monitoring, and structured cabling systems.

Our commercial division offers loss and theft prevention, life safety, audio/visual presentation, and structured cabling for corporate, warehouse, retail, multi-family and healthcare/assisted living home facilities.

BS Inc. offers same-day service to customers near and far. We are licensed and insured for the installation and monitoring of fire, security, and video surveillance systems.

We focus on keeping our overhead low. As a result, we are able to offer a blend of competitive prices and high quality service not found elsewhere.

Monitoring, Service & Maintenance

Protect your technology investments with one of our in-depth programs for all your fire/life safety, security, surveillance and access controls needs. Both new and existing systems can be evaluated to include monitoring and/or one of our comprehensive service plans.

Audio/Video

Multi-source, multi-zone systems operate independently, allowing you to listen to & control any source component you desire at any given time.

Communication

Video/voice intercom and door entry systems enable communication throughout your home, office, or retail establishment.

Security & Life Safety

Including comprehensive theft prevention, smoke/carbon monoxide detection, surveillance, sprinkler water flow & environmental protection for homes, offices, retail locations and warehouses. We also specialize in the design, installation and maintenance of behavioral and group home life safety systems.

Surveillance & Access Control

Video surveillance & access control technology provide 24-hour monitoring of traffic & accessibility throughout your premises.

Structured Cabling

Custom designed cabling systems to ensure flexibility for future & current needs.

BS, Inc.'s exclusive 24/7 continuous monitoring service operates from a UL listed and approved central station. We constantly watch for threats such as break-in's, fire, floor, carbon monoxide, and more. The monitoring station offers backup power generators and connectivity systems to ensure 100% uptime. And, we offer regular reports summarizing all activity.
