

STRUCTURED CABLING SYSTEMS

Structured cabling from BS, Inc. provides a critical foundation for your information network. Our custom-designed cabling systems allow flexibility for both current and future needs. We can design and install a wiring solution to meet all of your voice, video, audio, multimedia, and data application needs for your office or home.

Voice and Data Wiring

For telephone, fax, in-home network, home controls, HVAC, lighting, security, and internet access.

Bundled or Multimedia Cable

For cable television, satellite, home network, telephone, fax, internet access, and video distribution. Twisted pair and coax bundled under one jacket or siamese construction. Also available with optional fiber for future proofing.

Coaxial Cable

For cable television, satellite, and cable modem distribution.

Audio Cable

For whole home audio and home theater systems.
