

SECURITY & SURVEILLANCE SYSTEMS

One burglary occurs every 11 seconds in the United States. BS, Inc. can help you protect the people and assets you value. And, you may also enjoy lower insurance costs and the peace of mind knowing your property is electronically monitored 24 hours a day, every day.

BS, Inc. offers comprehensive theft prevention, life safety, smoke/carbon monoxide detection, surveillance, sprinkler water flow & environmental protection for homes, offices, retail locations, warehouses, and more.

Our exclusive 24/7 continuous monitoring service operates from a UL Listed and approved central station. The monitoring station offers backup power generators and connectivity systems to ensure 100% uptime. And, we offer regular reports summarizing all activity.

Standard Security Offering

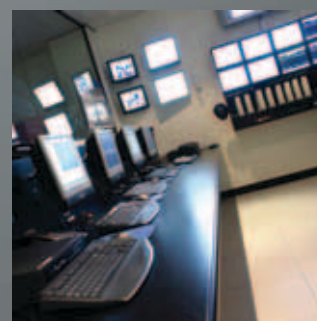

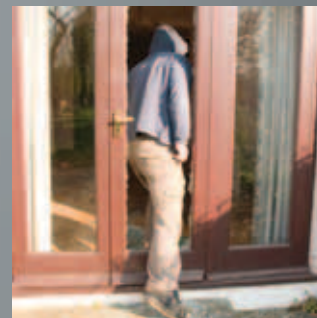

Offers an assurance of safety through protection against burglary and fire. Includes a master control panel, window sensors, smoke detectors, and door contacts to ensure maximum protection. Optional features available to enhance your security system include additional touchpads and numerous protective devices.

Extended Security Offering

Includes protection against burglary, fire, environment and carbon monoxide and provides optimum protection and convenience. It features custom touchpads, wireless keypads, sump pump alerts, and glass break detection for ultimate peace-of-mind.

Video Surveillance

Allows remote monitoring of entrances, your children, employees, customers, and vendors. Prevent and document workplace theft with discreet, comprehensive video monitoring systems. Solutions available for individuals, retailers, industrial settings, and corporate environments.
